Avi® Nitrile Powder Free Examination Gloves

Bagco Pty Ltd / Derma~Max Group have now the pleasure of introducing a *New* range of **Nitrile Medical Examination Gloves** which is an excellent alternative to latex gloves and designed to provide protection and comfort and at the same time to be economically viable to our clients in the health industry.

Avi® NITRI-SKIN PRO

Provides a powerful alternative solution for individuals who are allergic to natural rubber latex. Formulated with 100% nitrile (Acrylonitrile-butadiene), the gloves do not contain natural rubber latex protein and do not exhibit any chemical residue.

Special Features:

- An economical alternative to natural rubber latex gloves.
- Soft and stretchy nitrile formulation for improved comfort, fit & feel.
- Ambidextrous with excellent tactile sensitivity.
- Textured fingers of the glove provide extra protection for wet or dry grip and against slippage.
- Beaded cuff ensures easy doning & helps prevent roll down.
- Produced on special formers for less hand fatigue.
- Superior chemical resistance & barrier protection.
- Protects from a wide range of solvents, greases, oils and alkali solutions..
- Excellent tensile strength with better puncture resistance properties than latex gloves.
- Thiurams and mercaptobenzotiazoles free, decreasing the risk of allergic contact dermatitis.
- Statistically tested to an AQL of 1.5 for pinholes (exceeds established standards).
- No unpleasant odour.
- Three years shelf-life.
- Packaging: 200 pcs per dispenser box, 10 boxes in a carton.
- Size range: XS to XXL to fit different hand sizes.

Product Conformance:

- Confirms to ASTM D6319 and BS EN 455 Parts 1,2 & 3.
- In compliance with European Medical Device Directive 93/42/EEC with amendment 2007/47/EEC.

Quality Assurance: Manufacturing facilities in compliance with US FDA Quality System Regulation (QSR), ISO 9001:2008 & ISO 13485:2003

Product Specifications:

Thickness	
Fingers	0.08min
Palm	0.06min
Wrist	0.05min
Length	240 or above
PHYSICAL PROPERTIES	
Tensile strength	>14 Mpa
Ultimate elongation	>700%
Tensile strength after ageing	>14 Mpa
Ultimate elongation after ageing	>600%
