Hypoallergenic - Latex Powder Free Examination Gloves

Bagco Pty Ltd / Derma~Max Group have now the pleasure of introducing a *New* range of **Hypoallergenic Powder Free Latex Examination Gloves** to our clients in the health industry.

Features:

The Unique characteristics of Innovative Examination Gloves is in powder content and protein level which differentiate these innovative products in performance, functionality, and cost against similar products in the market place.

- These gloves are disposable medical grade latex gloves and are therefore designed for one-time use only.
- The textured finish allows a firm and safe grip while in use.
- The internal lubrication allows one to easily slip these gloves on and off.
- These gloves have good resistance and comfort along with good tactile sensitivity.
- Low protein contents (less than 20 mg/g).
- Very good donning properties
- Longer lengths
- Virtually no smell

Types and Sizes:

Innovative Gloves™ is available in Textured and Smooth formats in a range of sizes (X-Small, Small, Medium, Large, X-Large) packed 100 pieces per dispenser box.

Product Specifications

- Primary material is natural rubber latex in natural white colour.
- Ambidextrous with beaded cuff.
- Non-sterile, for single use only (disposable).
